

Joey Blackwell II

📍 Atlanta, Georgia ✉️ joeyblackwell005@gmail.com 🔗 [linkedin.com/in/joeybwrites](https://www.linkedin.com/in/joeybwrites)

PROFESSIONAL SUMMARY

Lead-level technical writer with 11 years documenting APIs, SDKs, and developer platforms, with the last four at Meta Reality Labs. Specializes in documentation architected for both human readers and AI consumers: AI-assisted authoring workflows, documentation knowledge graphs, retrieval evaluation, and content quality measurement. Co-author of research on evaluating LLM agent tool retrieval, under review at NeurIPS 2026.

EXPERIENCE

Content AI Development Team

Meta - Reality Labs | Remote

January 2026 - May 2026

- Co-led Content AI Development team work across 5 workstreams (AI-assisted authoring, content quality measurement, retrieval evaluation, documentation knowledge graphs), developing the tooling with Claude Code and internal AI tools.
- Structured documentation for AI and LLM consumption through learning objectives, knowledge-graph validation, JSON intermediates, markdown optimization, and retrieval-quality evaluation.
- Designed and shipped an engine-agnostic interactive diagram pipeline using Python, SVG, ImageMagick, and a custom CMS tag schema, producing typed clickable diagrams across 5 development engines.
- Helped scale Writermate bug-burndown workflows using JSON fix manifests, AI-assisted batch edits, and SME spot checks, reaching 75-83% hit rates across Unity and Unreal doc bug sets, including a 596-bug Unity backlog fix.
- Co-authored an arXiv preprint, under review at NeurIPS 2026, applying Bits-over-Random to LLM agent tool retrieval, evaluating when adaptive tool shortlists preserve coverage while reducing token-heavy over-retrieval and improving downstream tool choice.

Horizon Worlds Creator Documentation Lead

Meta - Reality Labs | Remote

June 2025 - January 2026

- Expanded from NPC and GenAI documentation ownership into broader lead responsibility for Horizon Worlds creator documentation, including Desktop Editor docs, release notes, page triage, launch support, and contingent writer coordination.
- Led creator-facing documentation for Horizon Worlds Desktop Editor through a weekly release cycle, supporting 38 releases, 120+ weekly creators, and 2,000+ H2 page views.
- Created and shipped PRD-to-docs tooling that reduced draft creation time by 1-2 working days and supported 2 major feature launches plus updates across 5 engineering teams.
- Established and standardized the Horizon Worlds release notes process, creating repeatable workflows for weekly launches, stakeholder review, and sustainable ownership transfer.
- Authored 100+ documentation diffs and 42+ targeted tutorial updates across Desktop Editor onboarding, NPC/GenAI tooling, mobile economy systems, and creator education content.
- Led contingent writers across the Horizon GA launch and follow-on feature work, directing 2 CWs and onboarding 1 new CW hire while coordinating page triage, technical review, timelines, and parallel documentation workstreams.
- Initiated the documentation-to-knowledge-graph partnership behind an in-editor GenAI Assistant, establishing learning objectives as its foundation and validating the 300+ node graph that powers it.

Horizon Worlds NPC & GenAI Documentation Specialist

Meta - Reality Labs | Remote

December 2024 - June 2025

- Owned documentation for Horizon Worlds NPC and GenAI creator-tooling workstreams, translating fast-moving AI features into practical guides, setup flows, and implementation support for creators.
- Authored and maintained documentation for AI speech NPCs, NPC scripting, and generative AI creation tools across the public Horizon Worlds Learn docs surface.
- Partnered with product, design, and engineering stakeholders to clarify expected creator workflows, validate technical accuracy, and turn emerging AI capabilities into usable documentation patterns.
- Created an M2 documentation template for NPC tooling and partnered with NPC and GenAI teams to test emerging features, refine UI/documentation gaps, and prepare launch-ready creator guidance.

Platform SDK Documentation Engineer

Meta - Reality Labs | Remote

May 2022 - December 2024

- Owned Platform SDK documentation for Meta Quest developer surfaces, including SDK concepts, implementation guides, sample-backed tutorials, API references, and launch documentation across Unity, Unreal, and Native.
- Drove Platform SDK documentation updates for Connect '24, leading simultaneous content, learning objectives, information architecture, and API-reference workstreams that all landed by the Connect '24 timeline.
- Reached 100% Platform SDK API reference coverage across Unity, Unreal, and Native surfaces by establishing reference templates, review workflows, and structured update patterns.
- Built self-serve contribution workflows through Info Sessions and contributor guidance, enabling 200+ engineer-authored diffs while preserving documentation quality.
- Helped design Bots4Docs, an early AI-assisted documentation workflow that guided engineer-authored diffs, validated documentation structure, and generated learning-graph and knowledge-graph inputs.

ADDITIONAL TECHNICAL WRITING EXPERIENCE

Technical Writer

Deposco | Alpharetta, GA

Aug 2021 - May 2022

- Created and maintained technical documentation for warehouse, supply-chain, and SaaS product workflows.
- Translated product behavior into user-facing guidance for implementation and support teams.
- Partnered with product, support, and engineering stakeholders to document procedures, release changes, and operational workflows.

Technical Writer

Ionic Data Security | Atlanta, GA

Nov 2017 - Jul 2021

- Authored and maintained API/SDK documentation, procedures, training materials, and customer-facing guidance for enterprise data security products using XML-based publishing workflows.
- Improved documentation quality and consistency across product, support, and implementation workflows.

Earlier Technical Writing Experience

SunTrust; Mitsubishi Electric; SEDC | Atlanta, GA

Sep 2015 - Nov 2017

- Built an early foundation in technical communication, analytics, web content, and cross-functional stakeholder support while working in banking, HVAC, and utility data roles.

EDUCATION

Bachelor of Arts - Writing & Linguistics

Georgia Southern University - Statesboro - 2014

SKILLS

Documentation Engineering: Developer documentation, API/SDK documentation, information architecture, release notes at weekly cadence, content strategy, editorial review, contributor workflows

AI & Knowledge Systems: Documentation architecture for AI/LLM consumption, markdown optimization, AI-assisted authoring (Claude Code), documentation knowledge graphs, retrieval evaluation, content quality measurement, structured context design

Technical Platforms: Python, TypeScript / JavaScript, Markdown, XML (Paligo, Oxygen XML), JSON, Git, VS Code, MadCap Flare, Confluence, Jira, CMS schemas; reads SDK code across Unity, Unreal, and Native surfaces
