

SENIOR DOCUMENTATION ENGINEER | DEVELOPER DOCUMENTATION & AI-ASSISTED WORKFLOWS

SUMMARY

Senior documentation engineer with 11+ years of experience across developer platforms, enterprise security, and SaaS. At Meta, authored and restructured developer documentation for human engineers and AI agents and built authoring workflows combining AI-assisted drafting with sharp editorial oversight to ship precise, scalable docs.

KEY ACHIEVEMENTS

- Reached 100% Platform SDK API reference coverage across Unity, Unreal, and Native.
- Initiated the documentation-to-knowledge-graph partnership behind Horizon Worlds' in-editor Creator Assistant, establishing learning objectives as its foundation and validating the 300+ node graph; the shipped agent was announced on Meta's developer blog and covered by UploadVR and Road to VR.
- After user feedback showed the Horizon Worlds tutorials assumed expert readers, set content-type and audience standards and led the overhaul, reviewing and verifying 42+ engineering-produced tutorials by hand against them.

EXPERIENCE

META PLATFORMS, INC. - REALITY LABS | 2022 - 2026**SENIOR DOCUMENTATION ENGINEER, CONTENT AI DOCS DEVELOPMENT TEAM**

REMOTE | JAN 2026 - MAY 2026

- Co-led the Content AI Docs development team: 5 cross-functional workstreams on a docs-as-code foundation, spanning retrieval evaluation, knowledge graphs, and AI-assisted authoring.
- Co-owned the docs-as-code platform powering developers.meta.com alongside engineering across four Meta roles (2022-2026), managing navigation, versioning, site configuration, and build/deployment workflows while participating in the docs-site on-call rotation.
- Restructured documentation for AI-agent consumption across primary documentation tracks via learning objectives, Markdown optimizations, and content validation.
- Cleared a 596-bug documentation backlog by defining, testing, and refining the agentic pipeline behind it, producing JSON fix manifests and production diffs that documentation engineers reviewed and shipped.
- Built and shipped AI-agent tool schemas, plugins, and hook configurations turning ad-hoc use of Muse Spark and other AI tools into governed, reliable workflows.

DOCUMENTATION ENGINEER, HORIZON WORLDS CREATOR DOCUMENTATION LEAD

REMOTE | JUN 2025 - JAN 2026

- Promoted into the documentation lead role for the Horizon Worlds Desktop Editor: owned the full left-nav information architecture and page set across a weekly release cycle (38 releases for a hand-picked cohort of 120+ creators).
- Reduced draft creation time by an average of 1-2 working days by creating and shipping AI-agent-based tooling that supported 2 major feature launches.
- Established the Horizon Worlds release notes process, the standing source for weekly launches, known issues, and workarounds; related content updates reduced support-ticket volume.
- Hired, onboarded, and led 2 contingent technical writers over ~8 months through major content releases and daily work including team coordination, work triaging, and priority escalations.

HORIZON WORLDS NPC & GENAI DOCUMENTATION SPECIALIST

REMOTE | JUN 2024 - JUN 2025

- Owned the complete NPC and Generative AI documentation on the public Horizon Worlds Learn surface: ~23 articles spanning speech NPCs, TypeScript-based NPC scripting, and the generative creation tools.
- Documented the end-to-end NPC and GenAI creation surface: scripted behaviors, animation, navigation, LLM-driven conversational AI, and the generative script, audio, texture, mesh, and environment tools.
- Shipped NPC/GenAI documentation across 30+ closed diffs in 2025, turning fast-moving AI features into practical creator guides that landed alongside public launches.
- Standardized a documentation template for NPC tooling, enabling feature testing and documentation through a broad software overhaul.

META PLATFORMS, INC. - REALITY LABS (CONTINUED)

PLATFORM SDK DOCUMENTATION ENGINEER

REMOTE | MAY 2022 - JUN 2024

- Owned Platform SDK documentation for Meta Quest developer surfaces: SDK concepts, implementation guides, sample-backed tutorials, API references, and launch documentation across Unity, Unreal, and Native.
- Established the reference templates, review workflows, and structured update patterns behind full API reference coverage across Unity, Unreal, and Native.
- Drove Platform SDK documentation updates for Connect 2024, leading simultaneous content, learning objectives, information architecture, and API-reference workstreams that all landed by the Connect 2024 timeline.
- Migrated Platform SDK documentation from the legacy developer site to developers.meta.com in partnership with engineering, managing content updates and redirects.
- Learned, structured, and documented the networked-services surface: 27 platform features including a 17-page multiplayer suite covering session management, group presence, invite and deep-link flows, reconnection, VoIP party chat, cross-play, and server-to-server webhooks.
- Built self-serve docs-as-code contribution workflows (Git-based, review-gated) enabling 200+ engineer-authored diffs while preserving documentation quality.
- Co-designed Bots4Docs, an early AI-assisted documentation workflow that guided engineer-authored diffs, validated documentation structure, and generated learning-graph and knowledge-graph inputs.

TECHNICAL WRITER | DEPOSCO

ALPHARETTA, GA | AUG 2021 - MAY 2022

- Created and maintained technical documentation for warehouse, supply-chain, and SaaS product workflows, partnering with product, support, and engineering stakeholders on procedures, release changes, and operational guidance.

TECHNICAL WRITER | IONIC SECURITY

ATLANTA, GA | NOV 2017 - AUG 2021

- Authored and maintained API/SDK documentation, procedures, training materials, and customer-facing guidance for enterprise data security products; documentation single-sourced in MadCap Flare with snippets and conditional text.

CONTRACT TECHNICAL WRITER & DOCUMENT SPECIALIST | MITSUBISHI ELECTRIC

SUWANEE, GA | AUG 2017 - OCT 2017

CONTRACT TECHNICAL WRITER | SUNTRUST

ATLANTA, GA | FEB 2017 - MAY 2017

JR. TECHNICAL WRITER | SEDC

DUNWOODY, GA | MAR 2015 - OCT 2016

RESEARCH

"How Many Tools Should an LLM Agent See? A Chance-Corrected Answer." Co-author, arXiv:2605.24660 (preprint).

EDUCATION

BACHELOR OF ARTS - WRITING & LINGUISTICS

GEORGIA SOUTHERN UNIVERSITY - STATESBORO | 2014

SKILLS

- **Technical Writing:** Developer documentation, API/SDK documentation, information architecture, release notes, content strategy, editorial review, contributor workflows, site migration and redirects
- **AI & Knowledge Systems:** Documentation architecture for AI/LLM consumption, markdown optimization, AI-assisted authoring, documentation knowledge graphs, retrieval evaluation, content quality measurement, structured context design
- **Documentation Operations:** Review-gated docs-as-code workflows, content-type and audience standards, reference templates, weekly release cycle, contingent-writer leadership
- **Tools & Platforms:** Git, Markdown, docs-as-code, TypeScript, Python, Claude Code, Muse Spark, Llama-powered generative AI tools, MadCap Flare
